

Contemporary Cladding System

A New Contemporary Cladding System

Our new contemporary cladding system allows you to transform your property, using a combination of PVC-U cladding and an innovative Aluminium trim system to provide a truly stunning installation.

When used together the maintenance free attributes of PVC-U Cladding, together with the sharp neat lines provided by Aluminium trims offer an unrivalled finish.

Whether you are looking for a complete refurbishment of your property, or looking for a stylish solution above bi-folding doors or conservatories

– then look no further.

Pvc-U Cladding

Aluminium Trims

Maintenance Free

Stunning Aesthetics

Clean Contemporary Lines

Maintenance Free PVC-U Cladding

Both the Closed V and Lap cladding systems which are completely unique, are manufactured using maintenance free PVC-U which can last over 30 years. The colours available include Anthracite Grey, Slate Grey, Black and Foiled White, of which all the colours perfectly match PVC-U windows, doors and rooflines.

Unique Aluminium Trims

Cladding installations traditionally use a PVC-U trims system to start and finish an installation. Whilst this is perfectly adequate, Aluminium trims can provide a neater and sharper finish to your cladding installation and improve the aesthetics of the job overall. All Aluminium trims are colour matched to the cladding.

CLOSED V CLADDING

LAP CLADDING

Closed V Cladding – Reach New Heights

Closed V cladding can be run vertically or horizontally to add a contemporary style and feature lines to your home, and when combined with Aluminium trims provides a neat, solid and sharp finish to any installation.

A popular application for the Closed V cladding system is when used next to an entrance door. The slick joints of the closed V cladding system can complement a door that has similar characteristics as shown in the picture above.

LAP Cladding - Great Coverage, Stunning Look

Our new contemporary Lap cladding has all the maintenance free benefits you'd expect from PVC-U, and can be finished neatly with an Aluminium trim system.

Lap cladding allows you to completely transform your home's facade quickly and easily, whilst perfectly matching any PVC-U windows, doors or rooflines of the same colour that you currently have, or that you might be looking to replace.

The Edge You've Been Looking For

Aluminium trims provide that edge you've been looking for. They are strong, neat and match the cladding colour perfectly.

1 Starter Trim

The unique starter trim is the most important part of the system overall. It's strength and rigidity provide installers the perfect start to the cladding installation.

When looking up at the starter trim, the radius finish provides unbeatable aesthetics that's not available anywhere else.

It also features a drip bar to ensure water doesn't flow over the lip of the trim, whilst also providing a clever concealed slot which allows the soffit to sit in, meaning other trims are not needed.

2 Corner Trim

Straight neat lines are what contributes towards a contemporary finish, and that's exactly what our two-part Aluminium trim offers. The inner profile provides a strong fixing to the substrate, with the external profile finishing the corner neatly and perfectly straight.

3 U Channel Trim

The U-Channel trim allows the cladding to be cut to size and used in a variety of applications, from short runs to several multiples of 5m in length. Like all our trims, the Aluminium provides the neat straight lines needed for a contemporary finish.

Long Life Expectancy

Aluminium trims are designed to last in excess of **30 years**.

White

Slate Grey

Dark Grey

Contemporary Colour Options

Both cladding systems, Closed V and Lap, are available in 3 contemporary colours to help transform your home. These include Anthracite Grey (7016), Slate Grey (7015), Black, and Foiled White. All finishes are smooth and do not carry a wood effect texture. Does white? All colours are supplied with matching powder coated Aluminium trims.

Complementary Products

Whilst you are obviously interested in cladding due to you reading this brochure, we appreciate cladding is probably only a small part of your overall project. So why not speak to your installer about other complementary products available from GAP including Rockdoors, windows, roofline, bi-folding doors and much more.

Peace of Mind Guarantee

Our cladding boards are BBA approved and come with a 10 year guarantee against warping, cracking and discolouration.
