Coupling Bar Detail

Heavy Weight Coupler (10mm wide)

Protruding

Recommended for the higher exposure category. The coupler protrudes this makes it the strongest design of all couplers offered.

CODE	WWL153
IXX (cm)	27.95
IYY (cm)	0.79
DEDUCTION	5mm Per Frame

Medium Weight Coupler (20mm wide)

Flush Fitting

Recommended where a higher exposure category or larger side frames is requested and the couplers remain Flush to the door frame

CODE	WWL106
IXX (cm)	24.5
IYY (cm)	2.4
DEDUCTION	10mm Per Frame

Coupling Bar Detail

Light Weight Coupler (10mm wide)

Flush Fitting

Recommended in lower exposure zones and for the narrower side frames.

CODE	WWL150
IXX (cm)	9.97
IYY (cm)	0.40
DEDUCTION	5mm Per Frame

1.5mm Coupler (1.5mm wide)
PVC-U

Only use on single door fanlights

CODE	PFC70
IXX (cm)	0
IYY (cm)	10
DEDUCTION	0.75mm Per Frame

Side Frame / Coupling Bar Max Sizes

72mm Reinforced Outer Frame to achieve 800PA.

Heavy Duty (10mm wide)
Rigidity : Very High

The door size cannot be larger than 900mm x 2070mm

MAX Sizes for Side Frames constructed from 72mm Reinforced Outer Frame using Heavy Duty Coupler

Medium Duty Coupler (20mm Wide)
Rigidity : High

The door size cannot be larger than 900mm x 2070mm

MAX Sizes for Side Frames constructed from 72mm Reinforced Outer Frame using Medium Duty Coupler

Light Duty Coupler (10mm wide)
Rigidity : Standard

The door size cannot be larger than 900mm x 2070mm

MAX Sizes for Side Frames constructed from 72mm Reinforced Outer Frame using Light Duty Coupler

It is the installers responsibility to ensure that the products are fit for purpose for the environment in which they are installed and the correct level of operational performance is achieved.

Bar Handle Detail 1200mm and 600mm

Technical Information

- Made from 1.5mm 316 grade stainless steel
- **32mm diameter** for sturdier construction
- Salt spray tested to ASTM B117 for 2,000 hours

1200mm

600mm

Fitting

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year.

This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Offset Bar Handle Detail 1200mm and 600mm

Technical Information

- Made from 1.5mm 316 grade stainless steel
- **32mm diameter** for sturdier construction
- Salt spray tested to ASTM B117 for 2,000 hours

600mm

1200mm

Fitting

Suitably line the holes up to where the handle will be fitted on the door making sure it is straight.

Take 'fitting A' and feed through the bolt. Screw 'fitting B' onto the other side.

Push each handle onto its fixings.

Screw the grub screws up tightly to secure the fitting.

For security you can round off the grub screws.

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year.

This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Bar Handle Fitting positions

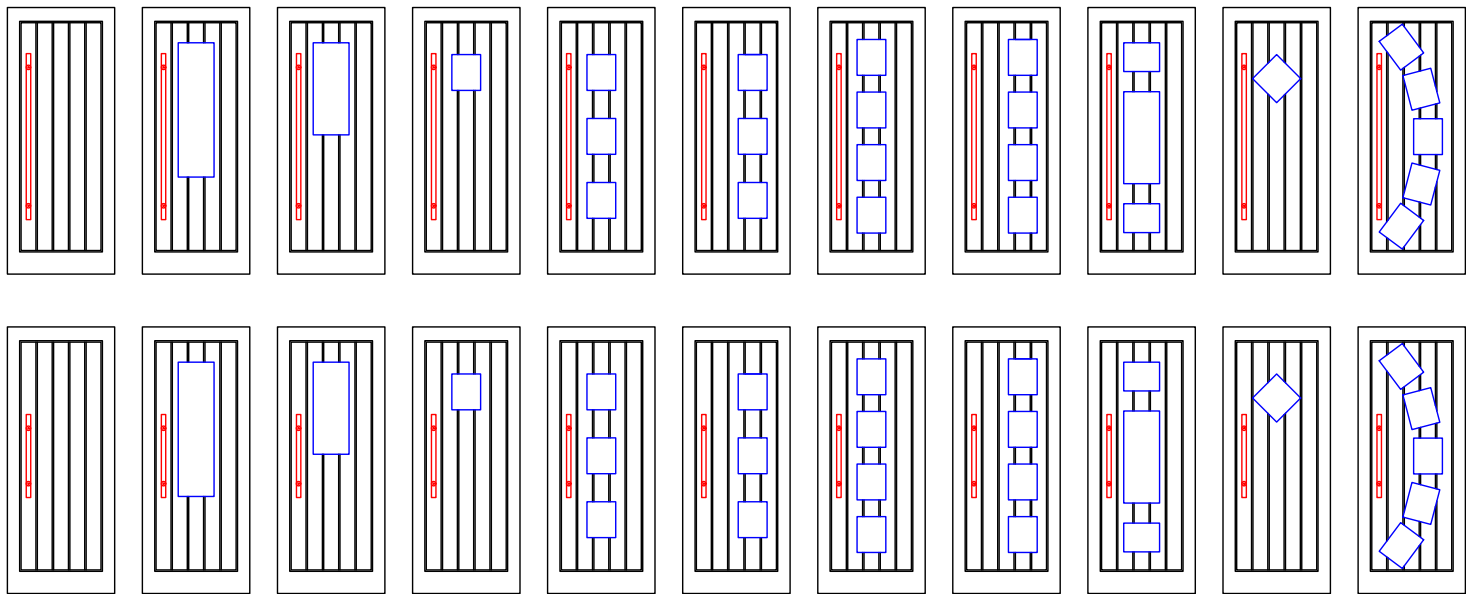

Sash Size 914mm to 870mm

· Bar handle 115mm from the edge of the sash

Sash Size 869mm to 776mm

· Bar handle in the centre of the first moulding.

Technical Information

- Made from 1.5mm 316 grade stainless steel
- 32.2 mm wide for sturdier construction
- Salt spray tested to ASTM B117 for 2,000 hours

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year.

This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Lever Handle

Technical Information

Corrosion resistance

Meets the requirements of BS EN 1670:2007 Grade 5 (480 hours)

Operation

Endurance tested in excess of 200,000 cycles

Performance

Tested to meet the requirements of PAS 24 as part of a compliant door set. 30 minute fire test to BS 476: Part 20/22: 1987

Material Specification

Handle Grip and Backplate:

Meets the requirements of BS EN 1670:2007 Grade 5 (480 hours)

Silver Spindle / Screws:

Machine screws with colour coordinated heads for handle. 60mm - 70mm profiles (1 x 8mm x 120mm spindle; 2 x M5 x 70mm and 2x M5 x 80mm screws)

Cylinder:

Euro Cylinder, 92mm PZ

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Pad Handle

Technical Information

Corrosion resistance

Meets the requirements of BS EN 1670:2007 Grade 5 (480 hours)

Operation

Endurance tested in excess of 200,000 cycles

Performance

Tested to meet the requirements of PAS 24 as part of a compliant door set. 30 minute fire test to BS 476: Part 20/22: 1987

Material Specification

Handle Grip and Backplate:

Meets the requirements of BS EN 1670:2007 Grade 5 (480 hours)

Silver Spindle / Screws:

Machine screws with colour coordinated heads for handle. 60mm - 70mm profiles (1 x 8mm x 120mm spindle; 2 x M5 x 70mm and 2x M5 x 80mm screws)

Cylinder:

Euro Cylinder, 92mm PZ

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Letterplate Positioning

Door sashes less than 1896 in height cannot have a letterplate fitted in the bottom rail.

Door sashes with a height between 1895 and 1926 can only have standard letterplate fitted in the bottom rail a TS008 will not fit.

Door sashes with a height more than 1927 can have both a standard letterplate fitted in the bottom rail.

Standard letterplates can be fitted in any size door where there is a midrail.

TS008 letterplates should only be **fitted in the midrail position** as PAS24 & SBD doors with a letterplate must have the letterplate above 700mm from floor level.

Letterplate (Standard)

Technical Information

Corrosion resistance

Meets the requirements of BS EN 1670:2007 Grade 5 (480 hours)

Operation

Flap cycle tested to 20,000 cycles
Conforms to the requirements of BS EN 13724: 2002

Performance

Tested to meet the requirements of PAS 24 as part of a compliant door set. 30 minute fire test to BS 476: Part 20/22: 1987

Material Specification

Flap:

High quality Zinc or Aluminium

Frame:

Black ABS

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Panel Sleeve Set
20mm-40mm

Midrail Sleeve Set
40mm-80mm

Fixing Screws Provided

Letterplate (TS008)

Technical Information

Specification

- TS008:2015 accredited
- Conforms to the requirements of PAS 24:2016 and Approved Document Q
- External unit corrosion tested to BS EN 1670 Grade 5-tested in excess of 1000 hours NSST
- Tested to 20,000 cycles

Material Specification

External Flap:

Austenitic 304 stainless steel

Internal Flap:

Aluminium

Maintenance

For continued protection of the quality finish and appearance, we advise routine cleaning.

Moving parts should also be lightly lubricated at least twice a year. This procedure is particularly essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or large industrial areas, where more frequent cleaning may be required to prevent the accumulation of corrosive contaminants.

Standard Hinge (Open in doors only)

2 way adjustment $\pm 2.5\text{mm}$ Height and Side adjustment.
Face fitting for a flush door to frame finish.
Robust 430 stainless steel body designed to carry up to 100kg on 3 hinges.

FINAL FIX HINGE SCREW

After any hinge adjustments the final fix hinge lock screw must be fixed in the centre hole fixing point.

Technical Information

Performance: Endurance tested to 100,000 operations, Load tested to 100kg on 3 hinges
Corrosion resistance: All finishes meet the requirements of BS EN 1670:2007 - grade 5 (500 hrs Salt Spray)

Material Specification

Hinge Body: 430 Stainless Steel
Hinge Cover: Zinc Alloy
Pin: 304 Stainless Steel

Maintenance

We recommend that all moving components are lubricated using a non-acidic mineral oil at least twice a year and surface cleaned with a damp cloth.

Optional Hinge (Standard on open out doors)

Technical Information

Performance: Endurance tested to 100,000 operations, Load tested to 100kg on 3 hinges
Corrosion resistance: All finishes meet the requirements of BS EN 1670:2007 - grade 5 (500 hrs Salt Spray)

Adjustment

Lateral +/- 3mm
Height +/- 4mm
Compression +/- 1.75mm

Maintenance

We recommend that all moving components are lubricated using a non-acidic mineral oil at least twice a year and surface cleaned with a damp cloth.

Restrictor

Restrictor (Supplied loose) **CODE: R/SLP10**

Installation

Frame

Fix the restrictor with two CFG43X35Z 140mm from the corner of the hinge side of the door frame.

Door

Fix the restrictor with one CFG43X35Z 60mm from the hinge side edge of the door.

Technical Information

Tested to 20,000 cycles.
Adjustable friction using screw in friction shoe.
Features integral damper to prevent door slamming.
Damper offers additional friction at end of travel and will hold door open.

Clear Openings

Standard Hinge

Optional Hinge

F24 Rounded End Single Pocket Keep

F24 Rounded End Centre Keep

F24 Rounded End Single Pocket Keep

Denotes Routing

Routing Details Based On Working Air Gap Of 4mm

*Cylinder 35/35 also available with a thumbturn option.

Technical Information

- BSi 1* Kite-marked - KM561977
- Secured by Design approved
- Supplied with 3 keys
- 6 pins
- Sacrificial cut lines on both sides of the cylinder so can be fitted either way round.
- Over 200,000 different key combinations.

Sacrificial cut

The cylinder has a sacrificial cut line, so when force is applied to the end, the cylinder will break away to the sacrificial cut line only, leaving the remaining cylinder operational and the locking mechanism intact.

Anti-bump

The cylinder has a unique and patented anti-bump system which does not use trap pins. This system makes the turning of the cylinder key extra smooth.

Anti-drill

Anti-drill pins are in each side of the cylinder.

Anti-pick

Anti-pick pins in each side of the cylinder makes it extremely difficult for a common burglar to pick the cylinder.

Maintenance

We recommend that the area highlighted with **blue** is wiped over with a lemon based very mild soap solution and a soft cloth once a month or every 2 weeks in areas of high sea salt such as coastal areas.

We recommend that the area highlighted with **orange** is lubricate with silicone based oil or graphite once a month or every 2 weeks in areas of high sea salt such as coastal areas.

***Cylinder 35/35 also available with a thumbturn option.

Technical Information

- BSi 3* Kitemarked
- Secured by Design Approved
- Sold Secure Approved
- Supplied with 3 Bio keys which have antibacterial and antiviral properties and have been tested to ISO 22196:2011 and ISO 21702:2019
- 6 pins
- Anti snap line on the outside of the cylinder
- Patented anti-bump timing pin system
- Patent applied for anti tilt mechanism
- Anti-pick pins
- Hardened steel anti-drill pins
- Does not use trap pins so no danger of cylinder entrapment
- Cylinder can open from the inside if attacked from the outside
- Over 200,000+ different key combinations
- Unrestricted keyway makes it easier for customers to get keys cut using the Kinetica key blank
- Tested to EN1303:2015

Maintenance

We recommend that the area highlighted with **blue** is wiped over with a lemon based very mild soap solution and a soft cloth once a month or every 2 weeks in areas of high sea salt such as coastal areas.

We recommend that the area highlighted with **orange** is lubricate with silicone based oil or graphite once a month or every 2 weeks in areas of high sea salt such as coastal areas.
